What you will learn from the study

We'll help you evaluate your skills level and ultimately give you the insight you need to become a better student or professional.

Assess your critical thinking abilities

Map your skills against other professionals

Discover which careers best match your skills

Why we are doing this study

Why we are doing this study

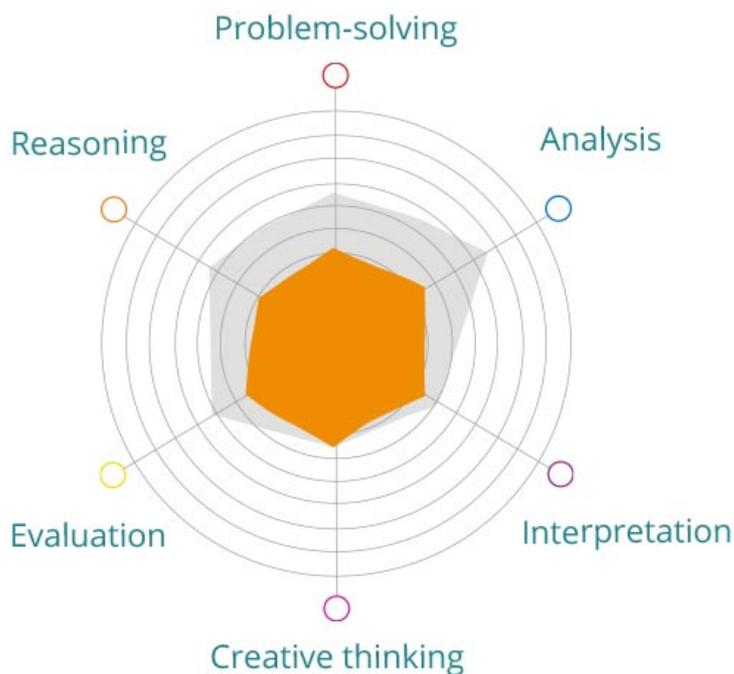

Our initial research showed that the best thinkers use six key skills:

- Problem-solving
- Creative thinking
- Evaluation
- Analysis
- Interpretation
- Reasoning

This new study allows us to gain a deeper insight into how the six aspects of critical thinking combine to make us better students and better at our jobs.

It is the largest and most ambitious study of critical thinking to date. Over 21,000 schools, universities, enterprises and individuals are already registered from across the globe.

We want you to be a part of this ground-breaking study.

Why critical thinking is vital

In the 21st Century, there is an increasing demand for critical thinking skills in the workplace.

Critical thinking makes you more adaptable, giving you the ability to take on new and unfamiliar tasks and be a more effective professional.

How is the study conducted?

How it works

The study is open to everyone, our online platform is designed to be used by individuals of all ages, across all professions and backgrounds.

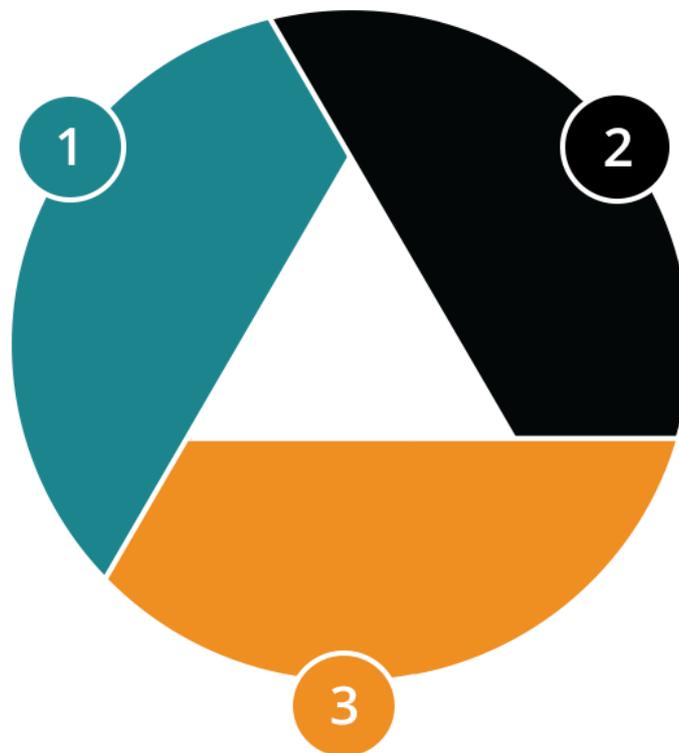

The three components to our study

You will be able to choose which elements you'd like to participate in closer to the start of the research.

Short Survey

10 Minutes

Establishes which thinking skills are valued by educators

Induction Test

40 Minutes

A test to establish your individual thinking skills across the 6 categories

In-Depth Analysis

By Request Only

A Cambridge-designed investigation into the teaching of critical thinking online
